Aims and Scope

The journal deals with the original research papers review articles and short communication written in English in all aspects of analytical and environmental sciences.

Journal covers fields of pure and applied analytical chemistry, comprising environmental material, agricultural chemistry, geochemistry, food chemistry, biotechnology, pharmaceutical and biomedical sciences, development and modification of instruments and techniques with potentials in environmental sciences.

The journal publishes original papers, reviews, current research notes and short communications. Reviews are written on invitation, in case and author wishes to write a review, he/she should contact the Editor-in-Chief for consultation. All papers are subject to peer review by two independent referees.

Readership

Chemists, Environmentalists, Industrial Hygienists and all others with interest in Analytical & Environmental Chemistry.
